

## Position: UI/UX Designer

### Responsibilities:

- Create intuitive and visually appealing user interfaces for web and mobile applications.
- Conduct user research to understand user needs and preferences.
- Design wireframes, prototypes, and user flows.
- Collaborate with development teams to implement and iterate on design solutions.

### Requirements:

- Bachelor's degree in Design, Human-Computer Interaction, or related field.
- Proven experience in UI/UX design for digital products.
- Proficiency in design tools such as Sketch, Figma, or Adobe XD.
- Strong portfolio showcasing previous design projects.
- Excellent communication and collaboration skills.

### Preferred Qualifications:

- Experience with front-end development technologies (HTML, CSS, JavaScript).
- Knowledge of design systems and design thinking methodologies.

---

## Position: AI/ML Engineer

### Responsibilities:

- Develop machine learning models and algorithms for data analysis and prediction.
- Collaborate with data scientists and software engineers to integrate AI/ML solutions into products.
- Implement and deploy models in production environments.
- Evaluate and improve the performance of existing models.

### Requirements:

- Master's or Ph.D. in Computer Science, Machine Learning, or related field.

- Strong programming skills in languages like Python or R.
- Experience with machine learning frameworks (e.g., TensorFlow, PyTorch).
- Understanding of data preprocessing, feature engineering, and model evaluation.

Preferred Qualifications:

- Knowledge of natural language processing and computer vision.
- Experience with cloud-based machine learning services (e.g., AWS SageMaker, Google AI Platform).

---

Position: Web Developer

Responsibilities:

- Develop and maintain web applications using HTML, CSS, and JavaScript.
- Collaborate with designers to implement responsive and user-friendly interfaces.
- Troubleshoot and debug web applications for optimal performance.
- Stay updated on web development trends and technologies.

Requirements:

- Bachelor's degree in Computer Science, Web Development, or related field.
- Proven experience in web development with a strong portfolio.
- Proficiency in front-end technologies (HTML5, CSS3, JavaScript).
- Knowledge of web development frameworks (e.g., React, Angular, Vue).

Preferred Qualifications:

- Experience with back-end development and databases.
- Familiarity with version control systems (e.g., Git).

---

Position: Java Developer

Responsibilities:

- Design, develop, and maintain Java-based applications.
- Collaborate with cross-functional teams to define software requirements.
- Write well-designed, efficient, and testable code.
- Troubleshoot, debug, and upgrade existing systems.

Requirements:

- Bachelor's degree in Computer Science, Software Engineering, or related field.
- Proven experience in Java development.
- Familiarity with software development methodologies.
- Strong problem-solving and analytical skills.

Preferred Qualifications:

- Experience with Spring Framework.
- Knowledge of database technologies (e.g., MySQL, PostgreSQL).
